

Market Overview

A supply-constrained, transit-served pocket of East Los Angeles — **minutes from Downtown and one of the nation's largest hospital and bioscience campuses.**

THE SUBMARKET

Boyle Heights sits directly across the Los Angeles River from Downtown — a dense, historically renter-occupied community with a low-rise vintage housing stock and minimal new supply. The result is a deep, durable tenant pool and persistently tight vacancy.

The location pairs that resilient residential demand with two of the region's largest job engines: the **LAC+USC / USC Health Sciences** medical and bioscience campus to the northwest, and the **City of Vernon** industrial district (~44,900 direct jobs) to the south — anchoring everyday rental demand independent of any single employer.

DEMAND DRIVERS

HEALTHCARE & BIOSCIENCE

LAC+USC Medical Center and the adjacent USC Health Sciences Campus — a 24/7 employment anchor for nurses, residents, staff and students.

DOWNTOWN LA JOB CORE

±3 miles to the DTLA employment base — a short hop west across the river for office, civic and creative workers.

RAIL + FREEWAY ACCESS

Metro E Line (Soto / Indiana) links tenants car-free to DTLA; direct on-ramps to the I-5, I-10, SR-60 & US-101.

SUPPLY-CONSTRAINED

Low-rise historic fabric and minimal new construction keep the renter pool deep and vacancy structurally tight.
